Commercial In-Floor Safes

In floor safes are designed to be buried in the floor and concealed by a dust cover under a rug or carpet. Installation should be done by a professional safe dealer.

Standard Features

- UL listed, S&G Group II combination lock
- Hard plate between the lock and dial ring.
- Full length locking bar hinge side of door.
- Independent relocking device to deter forced entry.
- Door frame is reinforced on bolt side.
- Coil spring assist on all doors for ease of opening and closing.
- Dust cover included.
- "B" rate burglary construction.
- 5 active 3/4" bolts on Models 1307, 1311 and 3600.
